

BALANCE

THE SMART SOLUTION TO
BALANCED NUTRITION

Most people know that fiber supports digestive health. But in addition to aiding digestion, fiber can also help lessen the impact that excess carbohydrates and cholesterol can have on the body. Soluble fibers, in particular, help support important bodily functions—soluble fibers help maintain healthy cholesterol and blood sugar levels. However, the prevalence of processed foods and modern farming techniques has led to higher levels of sugar and lower levels of fiber in the foods we eat.

Unicity Balance is a pre-meal drink with a patented fiber matrix that includes bioactive plant compounds, polysaccharides, and micronutrients. The fiber matrix is designed to help ease some of the impact that excess carbohydrates and cholesterol can have on the body. Balance is formulated to provide critical vitamins, minerals, and soluble fibers to help curb your appetite.

BALANCE

FAQ

How does Balance work?

Balance includes viscous soluble fiber. Viscous soluble fiber forms a thick gel when combined with water and as it moves through the digestive tract. The gel-like substance helps slow the emptying of your stomach, which results in prolonged satiety.

Why are there vitamins and minerals in Balance?

The vitamins and minerals in Balance help support proper digestion and help the body's enzymes work efficiently.

Can I take Balance at other times of the day or before having a snack?

Yes. Many people who use Balance find that they consume fewer snacks between meals, and if they indulge, they feel better afterward.

Who can take Balance?

We recommend Balance for adults who want to maintain good health. Pregnant and nursing women should consult their physician before taking Balance. As with any nutritional supplement, if you have any questions, consult your healthcare provider prior to use.

Can I drink Balance with other Unicity fiber products?

Each person's dietary fiber tolerance is different. When adding new sources of fiber to your diet, take it slow to avoid gastrointestinal discomfort.

Can I still take Balance if I forgot to take it before a meal? Should I skip it if I already ate?

It is always best to have Balance before a meal, but it would be better to take it late rather than not at all. It will still have some effect on the food that was eaten.

Can I take this product with less than the recommended amount of water?

Taking this product without the recommended amount of liquid may cause choking. Do not use this product if you have difficulty swallowing.
